

Beyond Controls is a Houston-based company with a fresh aspect on the management of controls, building automation and energy management. We provide our clients with smart building solutions, monitoring and control capabilities, quality service and essential training. Beyond Controls' systems are changing the way people, devices, and systems communicate, collaborate, and are secured across enterprises. Our systems are enabling users to go beyond, to manage and operate their facilities and equipment smarter, safer, more efficiently, securely and at peak performance levels. We believe in providing our customers with honest and quality service using a synergistic approach. Our customers should have the freedom to monitor and manage their own facility systems with the support of a knowledgeable company.

As an up and coming company in the Houston area we are always looking for talented professionals that want to feel like they are truly part of a TEAM. Come for a Career not just a Job.

Position: BAS Technician

The BAS Technician will work independently or as part of a team which will be responsible for the start-up and commissioning of newly installed building automation systems, Test and Balance (TAB) contractor support, and operator training.

The qualified candidate will possess the following skills:

- Competency in the functionality of Building Automation Systems and HVAC controls, including software engineering and commissioning tools, DDC controllers and field devices.
- LonWorks and/or BACnet protocol fundamentals.
- Niagara AX and/or Niagara 4 experience. Possessing a Niagara AX and/or Niagara 4 certification is a plus.
- Strong computer skills, including computer networking fundamentals.
- Ability to read low voltage electrical wiring diagrams and controls flow diagrams.
- Proficiency with test instruments and calibration tools.
- Ability to understand control wiring diagrams.
- Understanding of the operation of HVAC controls and HVAC equipment. This includes the ability to understand written sequences of operation.
- Previous experience working with Lynxspring, JCI, Honeywell or Distech is a plus.
- HVAC controls background.

Qualifications

- 3 years' experience performing startup and commissioning of Building Automation Systems and HVAC controls and the ability to work with a team.
- Must have own hand tools.
- Must be reliable and have excellent communication skills, both oral and written.
- Must be willing to submit to pre-employment screening, including criminal background check and drug screen.
- High school diploma or equivalent.
- 3-5 years of relevant work experience
- Proficient in Microsoft Office Software and strong PC skills.
- Possess strong organizational, interpersonal, and communication skills; both written and verbal.

Benefits:

Medical, Dental, Vision, L/S Term Disability, Life Insurance, 401K, and paid Vacation and Holidays.
